

Human forecasts of AI solving open mathematics

Survey months are shown in the legend. Each respondent group has its own color.

ESPAI asks about AI solving a long-standing open math problem on its own. Millennium problems are examples.

LEAP asks about AI solving or substantially helping to solve a Millennium Prize Problem.

Markers show reported values. Lines join those values as guides. ESPAI 2023 has one reported point.

ESPAI averages fitted probability distributions. LEAP reports median respondent probabilities. The questions and methods differ.
