

Forecasts with thinking on and off

All three model comparisons complete · AI helps solve at least one Millennium Problem

Thinking on Thinking off

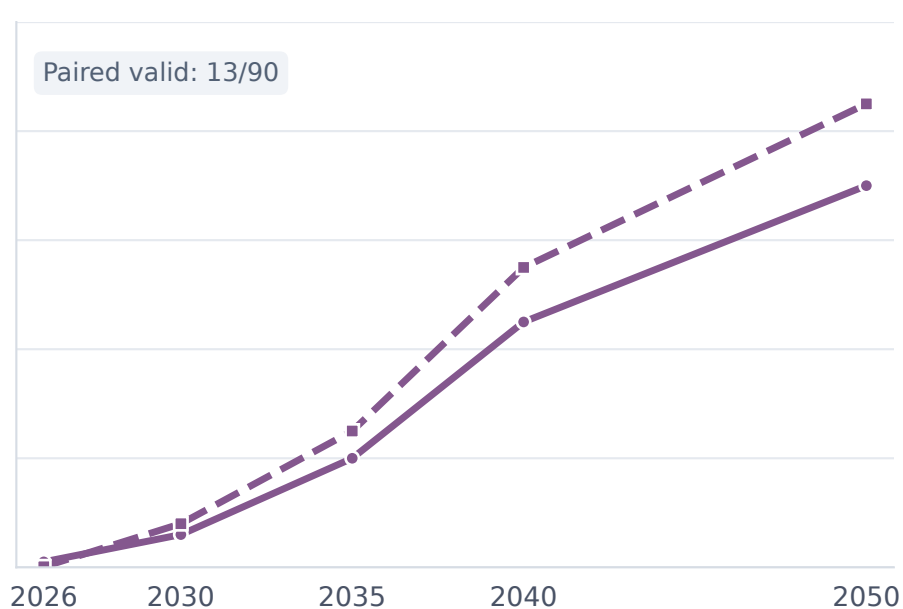

Qwen3 32B · 2025-04-29

Verified valid on: 90/90 off: 2/90

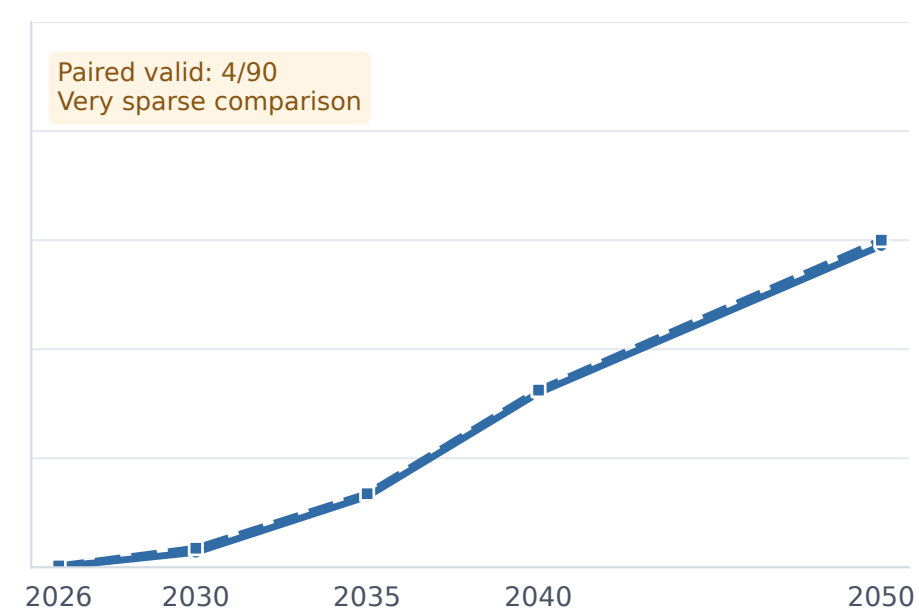

Qwen3.5 27B · 2026-02-24

Verified valid on: 14/90 off: 89/90

Qwen3.8 27B · 2026-08-14

Verified valid on: 4/90 off: 90/90

Curves: medians on the same valid matched draws. Each mode schedules 3 prompt variants × 30 draws; these are not training replicates.

Same weights, user prompts, sampling seeds and 4,096-token cap; only native thinking mode changes. Invalid and truncated replies are retained.

Counts include completed mirrored batches only; live batches may contain more outputs. Sparse valid pairs limit comparison; all-valid medians are separate.
